

SEO Toolbox

An Episerver add-on

***Goodbye broken links,
hello great SEO performance
and user experience!***

What is it?

SEO Toolbox is an add-on that automatically prevents broken links and improves a website's search engine ranking.

For all Episerver sites!

SEO Toolbox is stable, scalable and works great on both small sites and big international multilingual sites with thousands of pages. Whether you want to manage or move an existing site or build a new one.

SEO Toolbox

Formerly known as Mogul SEO Manager

Magic Redirect

Generates redirects (301) when pages are moved or renamed

Magic Sitemap

Generates sitemap dynamically for search engines

Magic hreflang

Inserts hreflang tags automatically in page headers

Avoid Duplicate Content

Map pages with friendly URLs to a single canonical URL

Keep SEO Ranking After Site Rebuild

Manage old URLs with bulk xmlfile upload or RegEx

Google Search Console Integration

Import redirects from Google Search Console

You don't need to be an expert in technical SEO!

Every 2nd site contains at least one broken link, it affects both small sites and bigger multilingual sites with thousands of pages. Some features above might seem confusing, but you don't need to be an expert in technical SEO when using SEO Toolbox. Many features work automatically in the background, so you can focus on creating engaging content!
